

WATER SOFTENER

Stylish, fitting equally as well into any utility room or kitchen

Exclusive design

Advanced

Efficient

Easy to use

WHY DO YOU NEED SOFTENED WATER?

Rain water passing through the layers of soil and rock absorbs mineral salts. In many cases these mineral salts cause the water to become 'hard', causing scale in hot water systems, scum around baths and sinks, blocking shower heads. Removing this hardness gives you all the benefits of softened water, wherever you live

SAVING MONEY

Scale builds up in pipes, boilers, washing machines and dishwashers. Just 1.6mm of scale build up in heating systems causes a 12% loss in heating efficiency, adding hundreds of pounds to heating bills. Scale also reduces the life of this equipment. Softened water stops scale build up, and can remove existing scale deposits in hot water systems as well as the scale around taps, in shower heads and stains on baths and showers.

SILKY FEELING SKIN, SOFTER LAUNDRY

Softened water has a clean silky feeling. Showers feel luxurious, hair is left feeling soft and bath time is full of bubbles. Softened water makes laundry feel softer, reduces the use of detergent and other chemicals.

Benefits

- Save money on energy bills
- Eliminate expensive maintenance bills
- Remove traces of scale in the shower bath or sink
- Give your skin a silky clean feeling
- Make your laundry feel softer and look brighter
- Reduce the high cost of soap and detergents.

MODEL 10L

Width	320mm
Depth	455mm
Height	595mm
Water Between Regenerations @ 300ppm	1666L
Suitable For	1-3 People
Inlet/Outlet	3/4" BSP Male
Drain Connection	1/2" Hose Fitting
Power Requirement	240V 3amp
Valve Power	12volt, 50Hz, Transformer

MODEL 15L

Width	320mm
Depth	455mm
Height	595mm
Water Between Regenerations @ 300ppm	2500L
Suitable For	4+ People
Inlet/Outlet	3/4" BSP Male
Drain Connection	1/2" Hose Fitting
Power Requirement	240V 3amp
Valve Power	12volt, 50Hz, Transformer

3 Versions Available:

Standard	In Time Clock or Metered
Water Save	Metered, 40% less water during regeneration
Eco	Metered, 10% extra capacity & 40% water saving

Accessories: Salt Block Holder (15l Only)

Colours may vary during the printing process
